Education

iACADEMY Nexus

Bachelor of Science in Information Technology Major in Web Development

Projects

Library Management System – Mini Project | Java GUI (Swing) & MySQL

- Developed a desktop application featuring full CRUD capabilities for seamless book record-keeping.
- Designed a tabular dashboard that enables real-time viewing of book titles, authors, and publication years.
- Integrated a status tracking feature to monitor whether a specific book title is "Available" or "Borrowed".

E-Commerce Product Management System | PHP & MongoDB Web Application

- Implemented full CRUD operations for managing product data (add, edit, delete, and view).
- Built role-based access control featuring a dynamic user interface and a secure, tabular admin dashboard.
- Integrated user authentication system (login/logout) and handled backend database connections.

iRent (Ongoing Project) | HTML, CSS, JavaScript, & Bootstrap

- URL: <https://irent-website.netlify.app/>
- Developing a responsive, campus-exclusive peer-to-peer rental platform using HTML5, CSS3, Bootstrap 5, and JavaScript to allow student filmmakers and designers to share high-end equipment.
- Implementing dynamic UI features including a responsive slider system (SwiperJS) for testimonials and custom dark/light theme switching based on local storage states.
- Optimizing site navigation and building user-friendly interfaces for digital listings, FAQs, and interactive dynamic dropdown systems.

Experience

Organization Treasurer

Aug 2025 - Present

iACADEMY COMPILE (Computing Students that Innovate and Lead)

Makati City

- Managed financial records and tracked organization funds.
- Assisted in budgeting and financial reporting.
- Collaborated with officers for event planning.
