Projects

Library Management System – Mini Project Java GUI (Swing) & MySQL

Makati City, Philippines
2026

- Developed a functional desktop application for library record-keeping using Java GUI and MySQL for persistent data storage.
- Designed a tabular dashboard that enables real-time viewing of book titles, authors, and publication years.
- Built full CRUD (Create, Read, Update, Delete) capabilities, allowing users to seamlessly add new books, update existing records, and remove entries from the system.
- Integrated a status tracking feature to monitor whether a specific book title is "Available" or "Borrowed".

E-Commerce Product Management System PHP & MongoDB Web Application

Makati City, Philippines
2025

- Developed a functional web-based product management system using PHP and MongoDB.
- Implemented full CRUD operations for managing product data (add, edit, delete, and view).
- Built role-based access with separate admin dashboard and user interface.
- Designed a tabular admin dashboard for efficient product management and data control.
- Integrated user authentication system including login and logout functionalities.
- Structured backend logic and database connections for handling dynamic data.

Leadership & Activities

iACADEMY COMPILE (Computing Students that Innovate and Lead)

Organization Treasurer
August 2025 – Present

- Managed financial records and tracked organization funds.
- Assisted in budgeting and financial reporting.
- Collaborated with officers for event planning.
